ZenMAS™

On-Board Realtime Vessel Positioning and Mooring Advisory Program

Enable/disable information's displayed

ZenMAS™

Versatility and Validation

- Custom developed for each vessel using drawings and mooring Design and Analysis Report
- Verification and validation of ZenMAS model is done by bench marking ZenMAS calculated values with design analysis report
- Considers Multi-segment mooring lines
- Considers the influence of riser stiffness on the system
- Real-time and Simulation Modes of Operation
- Displays
 - Mooring system showing vessel position and line tensions.
 - Catenary profile in 3D and 2D
 - Vessel motion history
 - Vessel relocation track
- Interfaces with control system for getting real-time data
